## MODULE 2: USA / Tier-1 High-RPM Page Setup (India Operation Blueprint)

To earn in US Dollars with high RPM (\$15 – \$35 per 1,000 views instead of \$0.50 in Tier-3 countries), implement this setup from Day 1:

- **1. Page Category & Naming:** Create the page under Business Category "*Media/News Company*" or "*Creator*". Choose universally relatable English titles without regional slang.
- **2. Language & Timezone Sync:** Set page default language to English (US). Schedule primary posts between **6:00 PM to 2:00 AM IST** (8:30 AM to 4:30 PM US Eastern Time).
- **3. High-RPM Niches in 2026:** *Luxury Real Estate, American Historical Mysteries, DIY & Woodworking Crafts, Police Bodycam & Courtroom Psychology, Personal Finance Lessons.*
- **4. Payout Structuring:** In Meta Payouts, select **Individual / Sole Proprietorship**. Enter your legal PAN and Indian Bank Account with its SWIFT/BIC code (HDFC, ICICI, SBI, Axis). Meta handles automatic currency conversion into INR with zero friction.

## MODULE 3: The 24-Hour Viral Group Sharing & Reach Multiplier (Anti-Ban Rules)

How top creators achieve 1,000,000+ reach in 24 hours without running paid Facebook Ads:

- **The 3-Account Multiplier Stack:** Never share directly from your Page Admin profile. Use 2-3 aged secondary Facebook profiles (6+ months old) solely for interacting with groups.
- **Public Auto-Approval Groups:** Join 15-20 public Facebook groups in your exact niche that have "Public Posting" enabled without admin manual approval.
- **The 1:5 Golden Ratio Rule:** Before sharing your post, like 3 group posts and comment meaningfully on 2 posts. Then share your page video. This prevents Facebook anti-spam flags.
- **The Watch-Party & Recommendation Trigger:** When a video gets 15-20 organic shares within the first 60 minutes, Facebook flags it as trending and pushes it onto the global "*Suggested for You*" feed.

## MODULE 4: AI Content Creation Pipeline & Anti-Copyright Shield

How to produce 5 to 10 viral videos and image posts daily in under 45 minutes using free AI tools without getting copyright strikes or "Limited Originality of Content" (LOC) flags:

### 1. The 3-Layer Visual Transformation (LOC Bypass):

If curating public educational footage: (a) Crop by 5-8% to change original framing, (b) Apply subtle color grading (Saturation +5%, Warmth +4%), (c) Add kinetic animated captions in CapCut, and (d) Overlay copyright-free background ambient music.
